"Who Wants To Know How To Get Your MP3+G Songs Professionally Loaded Into PCDJ Karaoki?"
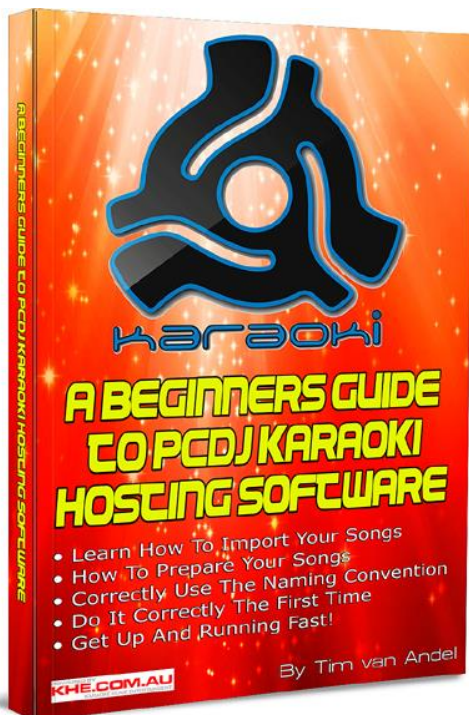

From: Tim van Andel, 1:13pm

Dear Friend,

Are you interested in getting your songs installed into PCDJ Karaoki fast ... then this is going to be the most exciting message you ever read.

Here's why:

There is an amazing new eBook called,

"A Beginners Guide to PCDJ Karaoki Hosting Software."

It covers everything you need to know to professionally install your MP3+G songs in a few quick steps into PCDJ Karaoki.

Imagine being able to have all your songs formatted correctly and fully accessible within the PCDJ Karaoki interface… Wouldn't that be great?

Or what about if you could be up and running in an hour? How would that feel?

Imagine being able to search for all your songs super-fast and have them professionally sorted. It truly is possible, but you need to know how.

That's what this brand new e-Book could help you to do.

It's not the PCDJ user manual it's a true step-by-step guide showing you what steps you need to take.

Why?

For one very simple reason:

You want to get started as soon as possible, features are one thing to learn but unless you get the songs plugged in and done correctly the rest is just a waste of time.

Precision step-by-step instructions with screen shot images so you get it done correctly.

I have witnessed it first hand with customers coming in after spending endless hours trying to get this done only to bring it in and pay us to professionally configure the

songs in the system for them.

Of course this can still be done but it doesn't come cheap with installation charges of $199.00 for 100 songs and upwards depending on the number of songs you need done.

My eBook will teach you how to do all this and for a fraction of that price.

Can you see now why owning this product makes such sense?

Adding new songs is a vital piece of knowledge needed when you're a karaoke host, so learning how to do it correctly is even more important.

It's not complicated and I have mapped out a simple *4 step process*.

1. *Best place for your songs on your PC.*
   Step 1 is all about location, location, location.

   Just recently a customer came in and he said he needed some help with his songs. Oh my, it was such a mess, songs on the desktop, this folder, that folder all over the place and he wondered why it didn't work.

2. *Preparing your karaoke songs.*
   Step 2 is the most important and I spend the most time here because you do the work once and everything else is just a click or two away from implementation.

   Mess this step up and you'll have an uphill battle on your hands as the alternative method which I don't even talk about in my eBook will take you so long to implement you'll give up.

3. *Creating your Cases.*
   Step 3 is all about how you organize your library in the PCDJ Karaoke interface, if you follow my 4 step process you would have done 95% of the work in step 1 and we replicate this is in the PCDJ Karaoki interface.
   Again I have seen some really bad examples of installs, organization is key to running a good show and generating song books for your singers.

4. *Importing your songs in to PCDJ Karaoki.*
   Step 4 is where most people end up with all the song data in the one column, generally being the "Title" column leaving the artist field blank and unsearchable.

   Why? Because of step 2, the bulk of the work is done in step 2, do the work once, do it correctly and steps 3 and 4 are a breeze and thousands of songs can be imported into "Artist" and "Song Title" columns in seconds not hours.

"A Beginners Guide to PCDJ Karaoki Hosting Software."

Your secret weapon for preparing your songs…

The best location on your PC for your songs…

Preparing your songs the professional way…

Best way to create your song cases…

Importing your songs correctly using the naming convention…

The little-known tips and tricks for a smooth setup…

Hours of time saved in 4 simple steps…

Click here to get the "Beginners Guide to PCDJ Karaoki Hosting Software"

SPECIAL EXTRA BONUS INCLUDED

Included with your eBook is an extra bonus tool I personally use all the time.

…and if you have thousands of songs in need of a tidy up this will be of a great help to you!

You can get started instantly, doesn't matter if its 2am your download will commence immediately for you.

The only thing I haven't mentioned here is the price for my eBook, click the above link I think you will be pleasantly surprised.

Warmly, Tim van Andel

Also available is my free "How To Install PCDJ Karaoki" Guide and "PCDJ Karaoki Instruction Manual", click to download.
